

Quality Management - MICRONOR

We guarantee a **comprehensive quality** awareness through the training and continuous training of our employees

Satisfied customers through the quality of our products and services are our top priority. To this end, we orient ourselves to customers and markets and develop problem solutions

We want to use **environmentally compatible materials** in our products and for the production of the products

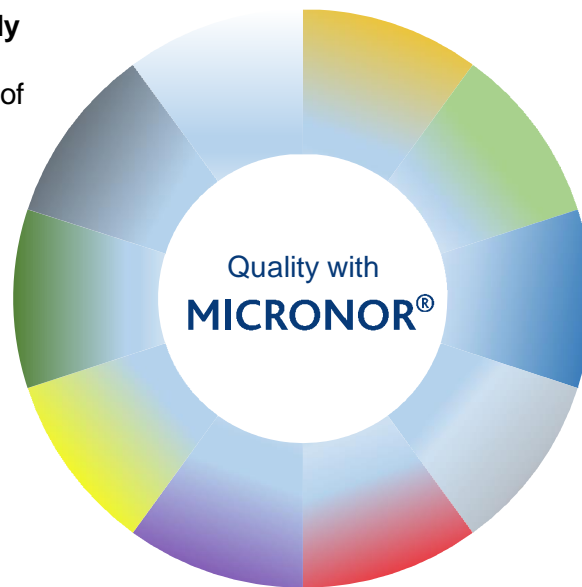

We avoid errors in the execution of our activities by means of analysis, **prevention and control of causes**

The management is committed to the **role example** of quality

We want constant **quality improvements** and evaluate the results

There is nothing you cannot **do better**

Quality is not an acquis, it has to be **reworked every day**

External and internal suppliers are our partners, with whom we realize our **quality targets** at a favorable price

We develop and produce **high quality products** at cost and functionality accepted by our customers
